

High Level Brief

Thanks for joining this last min remote hackathon organized out of [real frustration!](#)

We are looking to replace [Sessionboard](#), which costs >\$40k a year:

We do NOT expect to use everything... Which makes it easier for you to clone and makes less sense for us to pay.

Primary features we are looking for from **an open source clone that YOU make (and keep)**:

1. **Custom call-for-speakers submission forms** with conditional logic and category-based routing
2. **Self-service speaker portal** for bios, headshots, slides, and supporting documents
3. **Automated, templated speaker communications**, including reminders and calendar invites delivered directly to each speaker's own calendar (Gmail, Outlook, iCal)
4. **Submission evaluation and scoring workflows**, ~~including optional AI-assisted review across multiple rounds~~
5. **Drag-and-drop schedule and agenda building**, with automatic conflict detection across rooms and tracks, viewable by list, day, week, track, or room
6. **Real-time dashboard** showing which speakers still have outstanding onboarding tasks
7. ~~Native, one-way integration with Aceevents (our existing registration platform) to eliminate manual data re-entry~~
8. ~~Resource and wiki pages within the speaker portal, including HTML embed support for existing reference material~~
9. ~~Embeddable, mobile-friendly speaker gallery and schedule itinerary we can post to our website~~

Cloning the exact design is not a requirement; the point is to make a good-enough open source alternative that we never have to pay for this closed source SaaS if we can help it.

(IMPORTANT) Video Walkthrough: platform & requirements

<https://youtu.be/vUuK4Knl7oc>

This is a very hastily recorded walkthrough going thru the requirements in detail with visual references for your clanker (UPDATE: SEE BELOW FOR SCREENSHOTS) - we will do a more polished one on Saturday and one on Sunday morning clarifying requirements based on your feedback, after which **we will FREEZE** adding any requirements so that you can have some certainty/polish.

Discord

<https://discord.gg/XYXaapF4q> <- all updates and questions and communication here

Competition rules

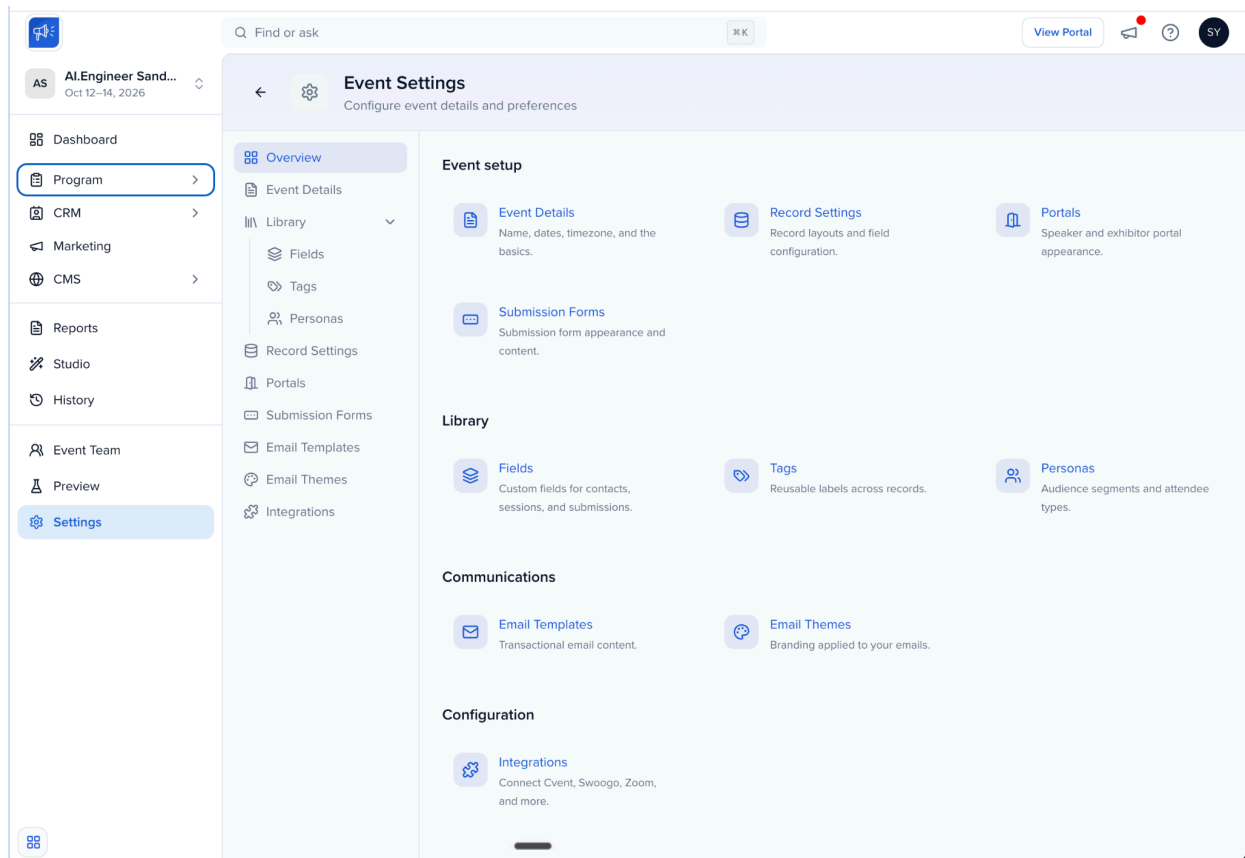

- **Timeline: aim to be done in a weekend, but you may need more time esp because we are starting late, so:**
 - **you have until Wednesday Aug 12 10PM PT to submit!**
- Submission involves:
 - Fill out our form we will send out
 - Open source repo with your code
 - so that you walk away with something regardless
 - Deployed site we can test out with the walkthrough shown
- Because so many people signed up, I can't proactively cover tokens, but people who SUBMIT valid attempts can ask for **reimbursement for up to \$500 in token cost** (will ask for proof, and will subjectively judge if there was a real attempt made)
 - This includes people just using their codex pro/claude max subscriptions
- The winning submission will:
 - Pass AIE team (not swyx) independent evaluation
 - Tiebreaker will go to whoever has made subjective judgment calls for the product that we would actually use/buy
 - **Get \$10,000 cash**
 - **Get on a call to do a walkthrough/interview for writeup on latent.space**
- Tech stack:
 - Choose whatever coding agents you want
 - Choose whatever language/tools/frameworks you want
 - Mild bonus points for deploy to Cloudflare infra
 - Bonus points for persistence/DB using Airtable
 - (Because those are what we use on our team)

- Very teeny bonus points for hosting source code/site on [Forge](#) instead of GitHub
 - (because this is my side project)
- Bonus points for speed/performance
 - we do not want slow SaaS pls
- Bonus points for API
 - <https://sessionboard.mintlify.app/introduction>

Questions welcome in Discord! <https://discord.gg/XYXaapF4q>

Program > Submission Forms > Create

The screenshot shows a web application interface for managing submission forms. On the left is a sidebar with a navigation menu. The main content area is titled 'Submission Forms' and includes a '+ Add' button with a dropdown menu that is open, showing 'Create Form' and 'Copy from...'. A red arrow points to the 'Create Form' option. Below this is a section for 'Collect submissions year-round with Speaker CRM' with a 'NEW' badge and a 'Learn more' link. A search bar 'Search forms...' is present. Below the search bar are tabs for 'All' (3), 'Open' (3), and 'Closed' (0). A dropdown menu shows 'Most Pending'. The main list displays three forms: 'Session Submission Form #2' (1 submission, 0 drafts, created Aug 7, 2026), 'Session Submission Form #3' (1 submission, 0 drafts, closes Sep 15, 2026, created Aug 7, 2026), and 'Submission Form' (0 submissions, 0 drafts, created Aug 6, 2026). Each form entry has status tags like 'Open', 'Abstracts & Participants', and 'V2', and a three-dot menu icon.

My Tasks

The screenshot shows the 'Profile' page of a user named 'Sw yx' (swyx@ai.engineer). The top navigation bar includes 'Home', 'Submissions', 'Profile' (highlighted), and 'Tasks'. A red arrow points to the user's profile icon in the top right, which has opened a dropdown menu with options: 'Profile', 'Back to Admin Mode', and 'Logout'. The main content area is titled 'Profile Info' and contains a 'General' section with a 'Biography' text editor (showing 'Enter text here...') and a character count '0 / 5,000 characters'. Below the biography are form fields for 'Salutation', 'First Name' (filled with 'Sw'), 'Last Name' (filled with 'yx'), 'Honoric', 'Pronouns' (a dropdown menu), and 'Gender' (a dropdown menu). To the right is a 'My Links' section with input fields for 'LinkedIn URL', 'X (Twitter) URL', 'Facebook URL', and 'Website'. A red callout bubble points to the 'Website' field with the text 'update your own bio data'.

Program > Agenda

The screenshot shows a web application interface for managing an event agenda. On the left is a sidebar menu with categories: SUBMISSIONS (containing View All, Abstracts, Sessions, Files), COLLECT & REVIEW (containing Forms, Evaluation, and the selected Agenda), INVOICES, SITE, PORTALS (containing Portals, Tasks, Forms, File Requests, Resources, Files), and CONFIGURE (containing Settings). At the bottom of the sidebar are links for CRM, Marketing, and CMS. The main content area is titled 'Agenda' with the subtitle 'Manage your event agenda and schedule'. It features a view selector (List, Day, Week, Month, Rooms, Conflicts) and a toolbar with search, saved views, columns, sort, filter, drafts, options, and an 'Add Session' button. The central area is currently empty, displaying a message: 'Nothing here yet' and 'Sessions will appear here in list view'.

CMS > Embeds (OPTIONAL)

The screenshot displays the 'Embeds' management interface within a CMS. The browser address bar shows the URL `appv2.sessionboard.com/event/6703/cms/embeds`. The left sidebar contains a navigation menu with the following items: Dashboard, Program, CRM, Marketing, CMS (expanded), Overview, Embeds (active), Reports, Studio, History, Event Team, Preview, and Settings. The main content area is titled 'Embeds' and includes a sub-header: 'Export a feed of your agenda, sessions, or speakers to place in your app or website.' Below this is a search bar labeled 'Search by name, format, or ID...' and a filter summary showing 'All 1', 'Enabled 1', and 'Disabled 0'. A '+ Add Embed' button is located in the top right. A 'View Portal' button is also visible in the top right corner. The main content area shows a 'New Embed' card with an 'Enabled' status indicator. The interface is clean and modern, with a light blue and white color scheme.

PARTICIPANTS BY ROLE

Role names (e.g. Speakers, Unconfirmed Speakers) come from this event's participant role settings. Each row is unique people in that role on a submission. The center total deduplicates people in multiple roles.

6

unique participants

Speakers 6 100% >

SUBMISSION STATUS

Counts session submissions (not people), at top level only.
